

FARM 2 FOOD FOUNDATION

ANNUAL REPORT
FOR 2019-20

DIRECTOR'S REMARK

2020 was a year of shocking pause. Pandemic threw everything into a complete chaos. While we were trying to figure out our response to the new situation, we had to drop everything and get into relief mode. Our mass scale relief operation reached out to 500 villages. Annual flood in Assam was severe this year. We extended our relief support to the flood affected villages. We procured 400 kgs of vegetables from local farmers for relief distribution. This ensured that the local economy kept rolling. As well as nutrition requirements of marginalized communities were fulfilled to a certain extent. We provided training support to several families to kitchen gardens. These families had lost their livelihood opportunity due to the lockdown. Our engagement with young people were moved into online mode. We kept our eyes and ears on the ground by conducting regular need assessment and surveys. In these gloomy times, we found several new supporters this year. This warm support helped us sail through the difficult period. Overall, this year we recalibrated our approach to respond to the need of the hour.

ACTIONS IN 2019-20

Learning Farmers

- Farmpreneur
- Mobile Science Lab
- Axom State Collective
- Be a Jagrik- Samvidhan Live
- Cultural Exchange Program (The India Project Say No To Discrimination)
- Swiss Re scholarship Program

Responses to Disaster

- Distribution of Flood Relief Materials
- Distribution of COVID relief materials

Emerging Farmers

- Organic Farming
- Goatery Training
- Exposure visits of S.H.G s
- Exposure Visit by Mentor Teachers From Delhi

Learning Farmers

- Ankur Darabdhara & Hemanta Hazarika of Pokamura H.S school, Jorhat as a part of the Jagrik project helped their fellow students in their neighbourhood who were weak in academics and learnt about the importance of fundamental duties.
- Priya Manki of class 7 from Chamoguri MES, was a school dropout. One of our members as a part of the mobile science lab project helped her learn how to examine a leaf under a microscope. Such simple activities helped bring her interest back in the academics. Farm 2 Food successfully helped her get back into school.

2019

ZABARDAST JAGRIKS
who walked the extra mile..

A photograph of two young girls in school uniforms (blue shirts and dark blue ties) standing outdoors. They are both smiling and looking towards the camera.

Out of various tasks like understanding the status of women from different religions, communities and classes, to understand the importance of creating a clean and safe environment free from diseases, the task of taking a beggar to a fancy restaurant was most interesting for us. It made people at the restaurant curious and eventually contribute to helping him. This made us realize that equality can be achieved only when each and every one of us resolves to erase it.

Emerging Farmers

- More than 100 S.H.Gs in Jorhat district alone in the year of 2019-20 produced 3500 kgs of vermicompost and sold it in the market and earned a good profit throughout.

Responses To Disaster

- During the first phase of lockdown, Farm 2 Food has been able to reach out to more than 800 vulnerable families in the tea garden areas of the Jorhat & Golaghat district. More than **13 tons** of food grains & **4 tons** of vegetables procured from local farmers were distributed as a part of our relief operations.

THE YEAR ON A QUANTITATIVE ROLL

Learning Farmers

5000

Emerging Farmers

6000

Relief Outreach Villages

500
